

Kick-rash Lotion

Kick-RASH lotion is used for treating certain yeast and fungal infections of the skin in Dog.

Benefits:

It treats certain yeast and fungal infections.

Indicated for the use in Eczematous dermatosis complicated by bacterial and fungal infections, Otitis and wounds.

Kick-RASH also reduces inflammation, rash , redness, calming the skin and allowing it to heal.

100ml Bottle

Kick-rash Lotion

How it Works:

The ingredient Miconazole Nitrate is imidazole antifungal and works against fungi and yeast such as *Malassezia pachydermatous*. Miconazole inhibits ergosterol incorporation into cell membranes so increasing concentrations of cytotoxic hydrogen peroxide within the fungal cell wall.

Clobetasol propionate is a corticosteroid of the glucocorticoid class used to treat various skin disorders & also reduces Inflammation.

Ofloxacin is a broad-spectrum antibiotic that is active against both Gram-positive and Gram-negative bacteria. It functions by inhibiting DNA gyrase, which is an enzyme necessary to separate replicated DNA, thereby inhibiting bacterial cell division.

Cautions:

Not For Human Use
For External use Only
For Animal Treatment Only

Kick-rash Lotion
